On Friday, September 27<sup>th</sup>, Kozu High School hosted the opening ceremony for the Youth in Asia Science Forum in Osaka 2024. Participants from Kozu High School and Otemachi Private School were joined by one student and one teacher respectively from three of our partner schools, Angelicum College, Tainan Girls School, and Tainan High School. Students began the day with a school tour, lectures, and experiments before leaving school to provide the visiting students with a tour of Osaka lead by Kozu students.

During this excursion the groups went to various locations such as Osaka Castle, Dotombori, Shinsaibashi department stores, takoyaki food stands, and even a purikua photo booth. The visitors from overseas reported having a wonderful time and felt like they were able to get to know Osaka and Japan more.

On Saturday, September 28<sup>th</sup>, Kozu hosted day two of the Youth in Asia Science Forum. Students began the day with a lecture on the Asian atmospheric environment by Professor Takenaka from Osaka Metropolitan University. Where students were able to compare the ozone levels in the atmosphere of different Asian country see the effects of airborne pollutants.

In the afternoon, students participated in a PH water testing lab lead by Professor Tachibana of Kobe Gakuin University before concluding with group and individual presentations. Student presentations varied from local water quality findings, to runoff water effects on the ocean, to cultural presentations depicting life in other countries. Following presentations, students played games from each of the visiting students' countries as well as games they prepared
